

UVS INTERNATIONAL & EUROSATORY TEAM

UVS FORUM

at the 2008 Eurosatory Exhibition Will Focus on UGV Systems + Micro & Mini & Tactical UAS

Subsequent to their successful partnership in 2006, UVS International has once again entered into a partnership with COGES⁽¹⁾, the organisers of Eurosatory, the world's prime land forces & army aviation equipment exhibition, which takes place at the Paris-Nord Villepinte exhibition center (just north of Paris, France) once every 2 years. The next Eurosatory Exhibition will take place on 16-20 June 2008 (the week following the UAS 2008 conference & exhibition).

This international exhibition will feature an interior exhibit area in a prime location (close to the French Ministry of Defence stand), which will be totally dedicated to unmanned vehicle systems [unmanned ground vehicle (UGV) systems and micro & mini & tactical unmanned aircraft systems (UAS) , as well as sensors & other related sub-systems].

This exhibit area, designated the UVS Forum, will consist of furnished booths of 6m² + 9 m² additional carpeted bare floorspace for exhibiting equipment. The interior of the rectangle formed by the stands will contain the UVS Forum Auditorium and the UVS Forum Meeting Area, both of which will be for exclusive use by the UVS Forum exhibitors.

The UVS Forum Auditorium will be equipped with a computer, a beamer/projector and a projection screen. This area and its projection equipment can be used by the exhibitors to schedule presentations of their products and/or videos of their products. The exhibitors will be able to announce their scheduled presentations on an announcement board at the two entrances to the presentation area.

The UVS Forum Discussion Area will have a hostess and be equipped with tables and chairs, and will be for the exclusive use of the UVS Forum exhibitors and their guests. The Discussion Area will be equipped with refrigerators for stocking mineral water and soft drinks, and will also have a coffee machine.

There will be possibilities to dynamically demonstrate smaller UGV systems (< 150 kg) in a dedicated interior demonstration area equipped with an obstacle course and located right next to the UVS Forum. Larger UGV systems (> 150 kg) can be demonstrated on the exhibition's exterior demonstration terrain.

The UVS International partnership with COGES has resulted in extremely attractive prices. All booths will be equipped with a facial board with the name of the exhibiting company, a rail with 3 spotlights, an electrical output (2 sockets) and dark blue felt carpeting. The optional furniture package of such a booth, consists of: 1 table with 3 drawers, 2 chairs, and 1 brochure presentation rack. Additional furniture, as well as video monitors can be rented from the accredited Eurosatory suppliers (see www.eurosatory.com)

All relevant information is posted at www.eurosatory.com, www.uvs-info.com & www.uvs-international.org.

On-line reservation is possible at www.eurosatory.com. To obtain additional information & receive the official exhibitors information pack, the UVS Forum information request form on the next page (also posted on www.eurosatory.com, www.uvs-international.org & www.uvs-info.com & www.uas2008.org) should be completed and faxed to Eurosatory at: 33-1-42.30.70.88
